

Welcome to O-Pitblast!

Let's take a look at the principal functionalities of O-Pitblast.

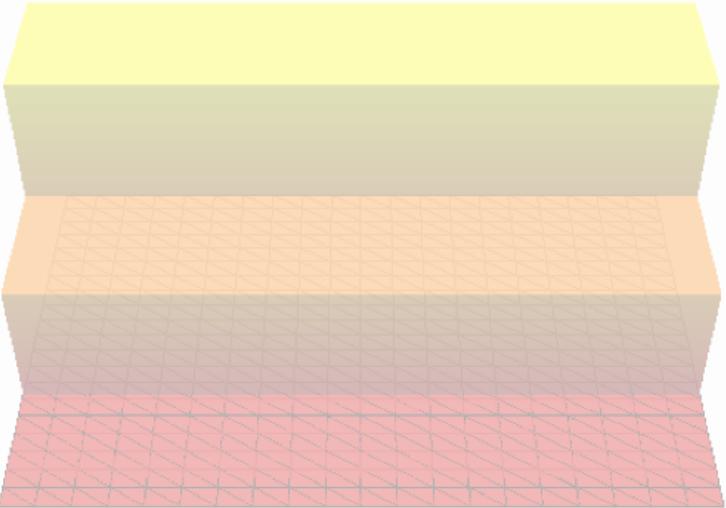

Step 1 of 23

O-Pitblast Modules

In this tab you can navigate through all modules included in O-Pitblast.

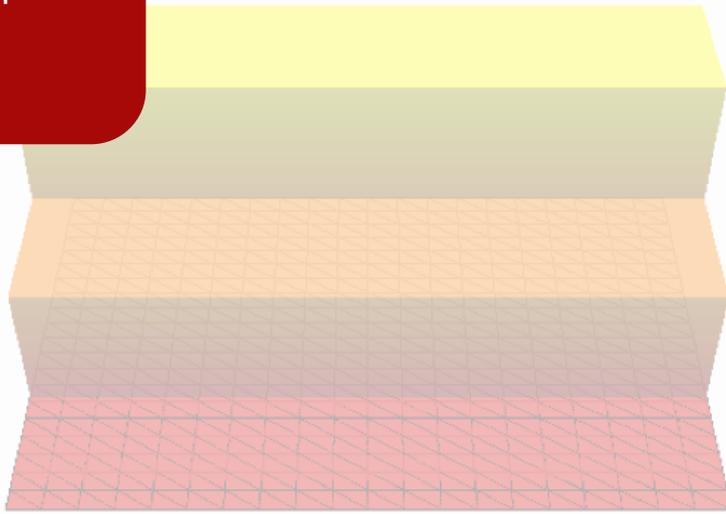

Step 2 of 23

Import Terrain Import Layer Topography Preparation Contour Lines Outliers Cut Terrain Expand Terrain Bench Bottom Edit Cloud Eliminate Triangles Views Export Select Davey Rock

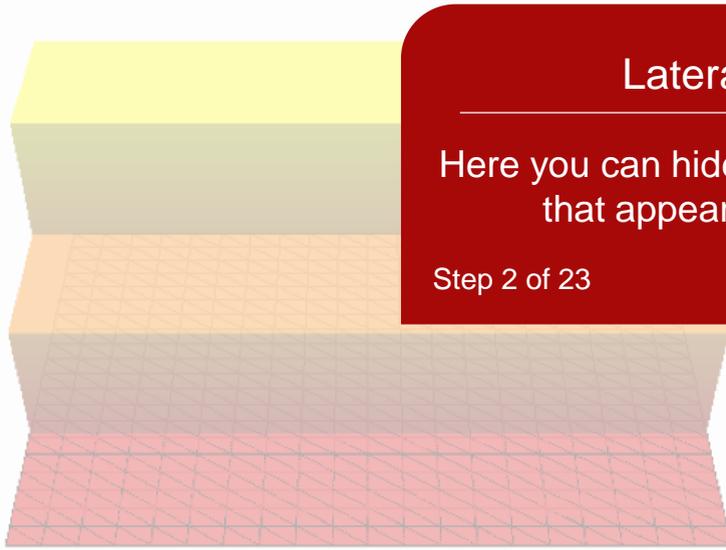

Close, Sun, Terrain, Lock, Scale, Grid, Rotate, Zoom

Tool Box
Here you can change visual aspect of O-Pitblast.
Step 2 of 23

Import Terrain Import Layer Topography Preparation Contour Lines Outliers Elevation Expand Terrain Cut Terrain Bench Bottom Edit Cloud Eliminate Triangles Views Export Select Davey Rock

Vertical toolbar with icons for various functions like zoom, pan, and view manipulation.

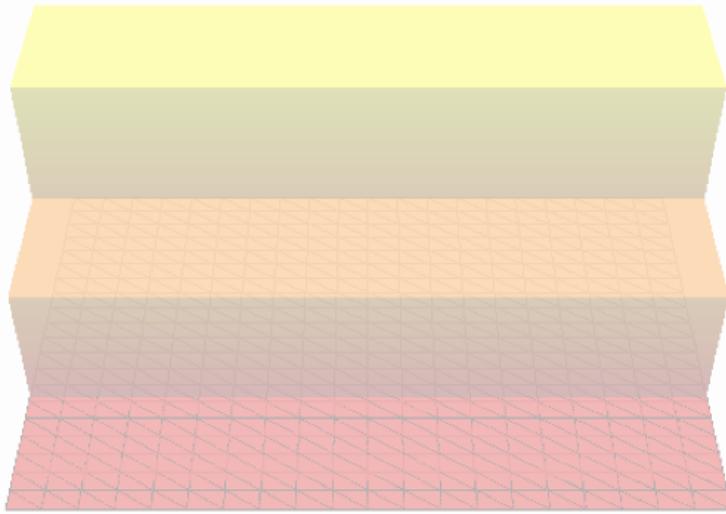

Lateral menu
Here you can hide/unhide information that appear in O-Pitblast.
Step 2 of 23

Import Terrain

You can import your terrain X, Y and Z coordinates. You can use .dxf, .csv and .txt files.

Step 3 of 23

Import Data

Column0	Column1	Column2
X	Y	Z
243592.149	8344659.127	3780.000
243590.652	8344654.228	3780.000
243583.976	8344656.142	3780.000
243585.549	8344661.288	3780.000
243593.909	8344664.161	3780.000
243631.962	8344671.443	3780.000
243589.333	8344649.307	3780.000
243582.601	8344651.012	3780.000
243575.191	8344652.888	3795.000
243576.628	8344658.249	3795.000
243578.284	8344663.668	3795.000
243587.401	8344666.587	3780.000
243589.615	8344672.174	3780.000
243596.020	8344669.487	3780.000
243598.574	8344675.249	3780.000
243601.661	8344681.582	3780.000

Use separator Add as extra points

Select Data

Define your X, Y and Z columns and separator, e.g. comma, space, etc.

Step 4 of 23

Import Data

Column0	Column1	Column2
X	Y	Z
243592.149	8344659.127	3780.000
243590.652	8344654.228	3780.000
243583.976	8344656.142	3780.000
243585.549	8344661.288	3780.000
243593.909	8344664.161	3780.000
243631.962	8344671.443	3780.000
243589.333	8344649.307	3780.000
243582.601	8344651.012	3780.000
243575.191	8344652.888	3795.000
243576.628	8344658.249	3795.000
243578.284	8344663.668	3795.000
243587.401	8344666.587	3780.000
243589.615	8344672.174	3780.000
243596.020	8344669.487	3780.000
243598.574	8344675.249	3780.000
243601.661	8344681.582	3780.000

Use separator
 Add as extra points

Import Data

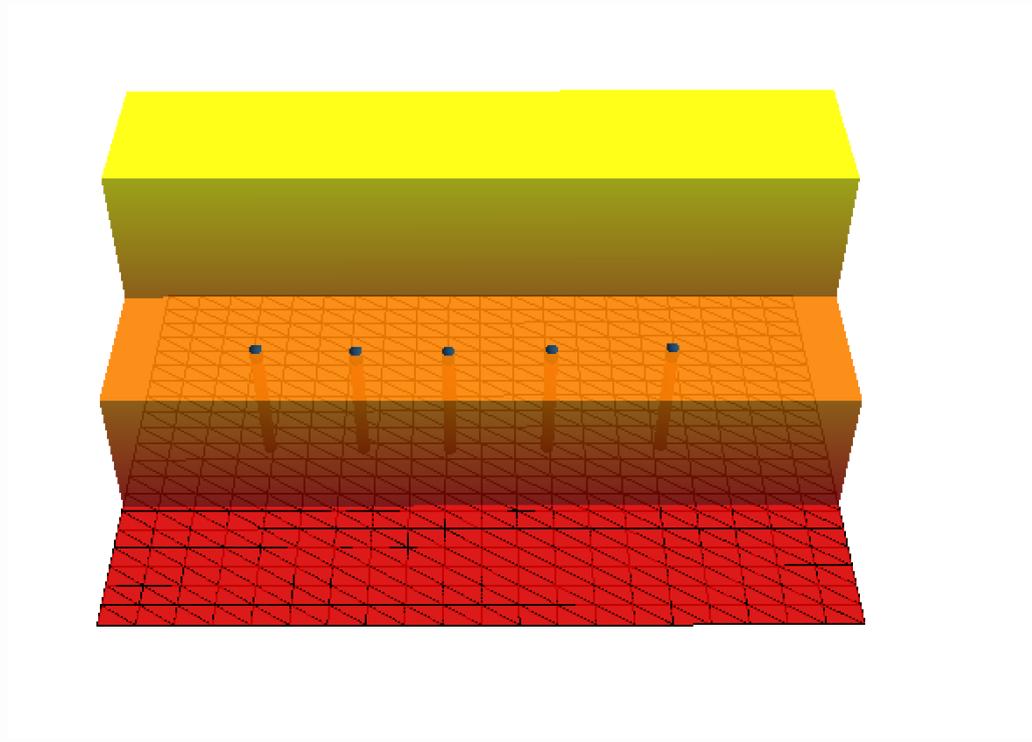

Click on "Import Data" button to proceed with the importation.

Step 5 of 23

Software toolbar with icons for Edit Hole, Add Hole, Update Altitude, Renummer, Automatic Increment, Add Row, Line Editor, Pattern Creation, Import Pattern, Rotate Pattern, Import Zone, Type, and Export Data.

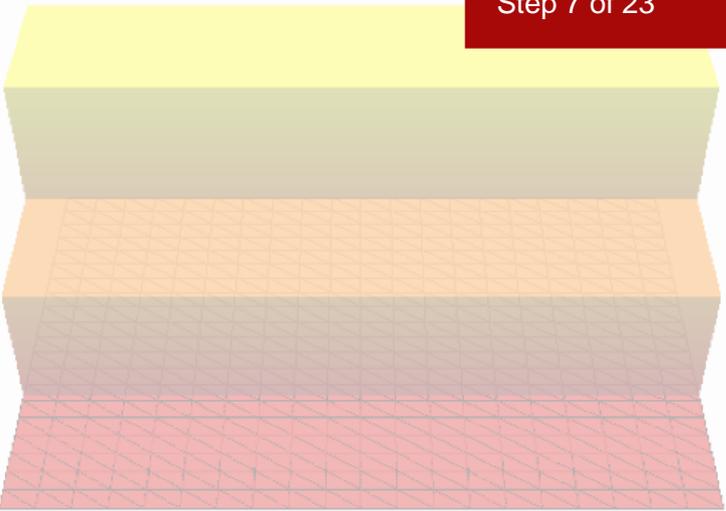

Add boreholes
Create individual boreholes.
Step 6 of 23

Pattern Creation

Create your pattern based on geometric inputs.

Step 7 of 23

Pattern Creation

Choose your burden, spacing, number of rows and azimuth and click on the "Ok" button.

Step 8 of 23

Pattern

Multiple Burden/Spac.

Burden (m): 3.00

Spacing (m): 3.00

Holes per Row: 10

Number of Rows: 3

Azimuth: 180.0

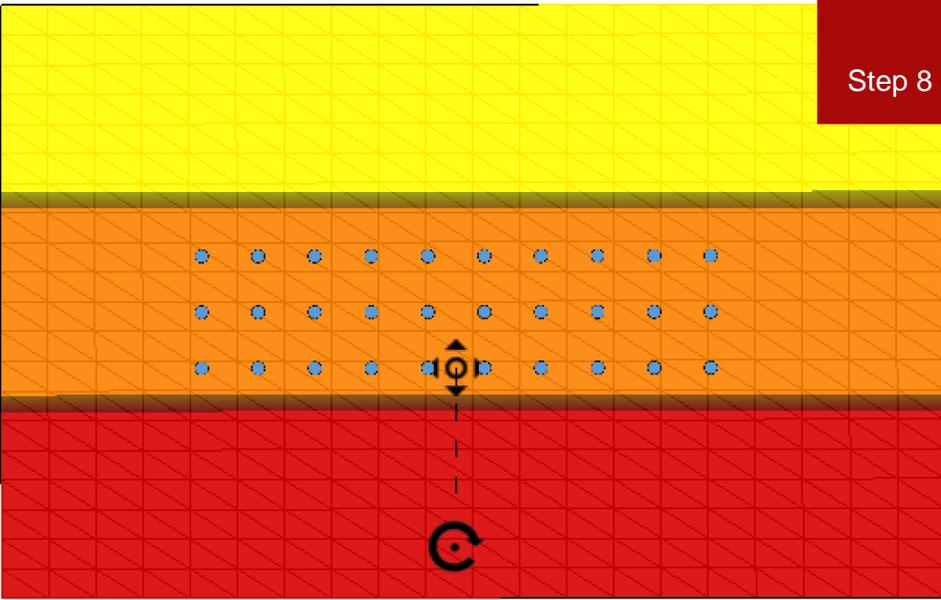

Attenuation (%): 15

Attenuation 2 (%): 15

Crest Toe

Crest and Toe

Ok

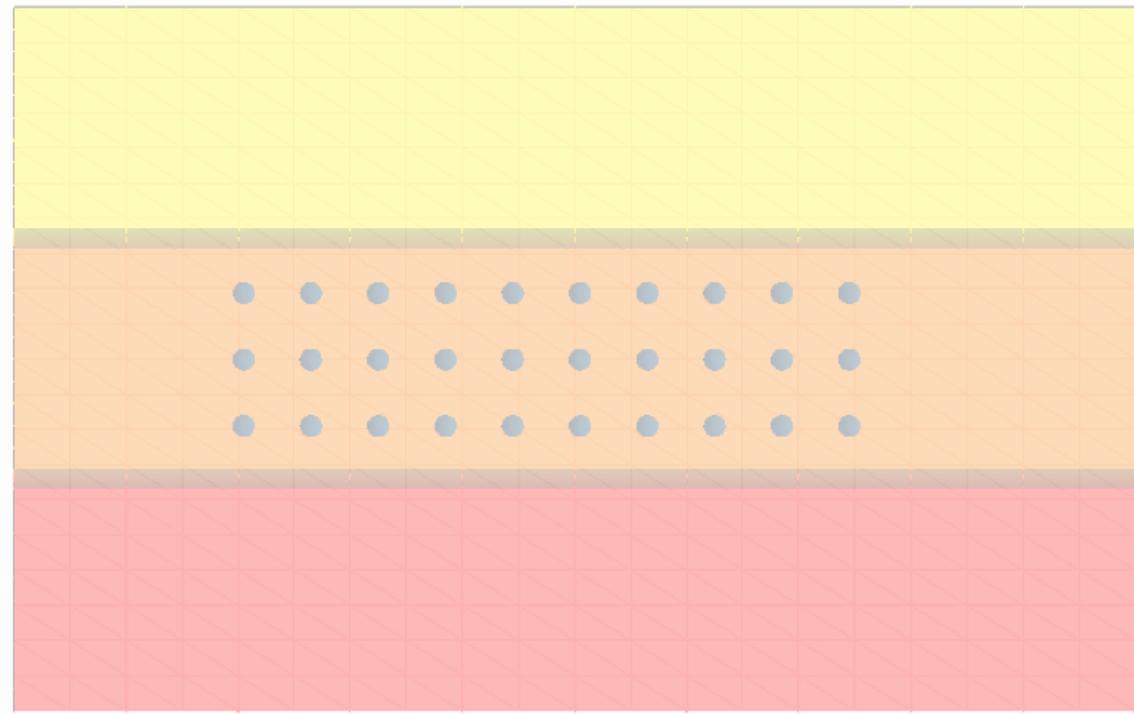

Edit Rule Add Charge

Manually Feeding Complete Charge Extra Charge Manually

Add charge

Add charge to your holes by selecting this tool and then click in one hole.

Step 9 of 23

Charge

Discharge Import Charge By Powder Factor Manually Feeding Complete Charge Extra Charge

Select

Manually

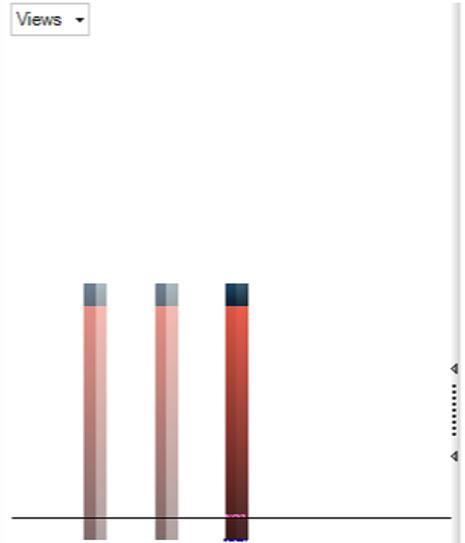

Vertical toolbar with various icons for editing and visualization.

Borehole Information

Row Number: 3

Borehole Number: 21

Straight Critical

Geometry Charge Timing Others

Packing Factor (%): 0 Auto

Quantity of Elements: 2

Apply

Context menu: All Holes, Production Holes, Buffer Holes, Contour Holes, Ghost Holes

Add charge

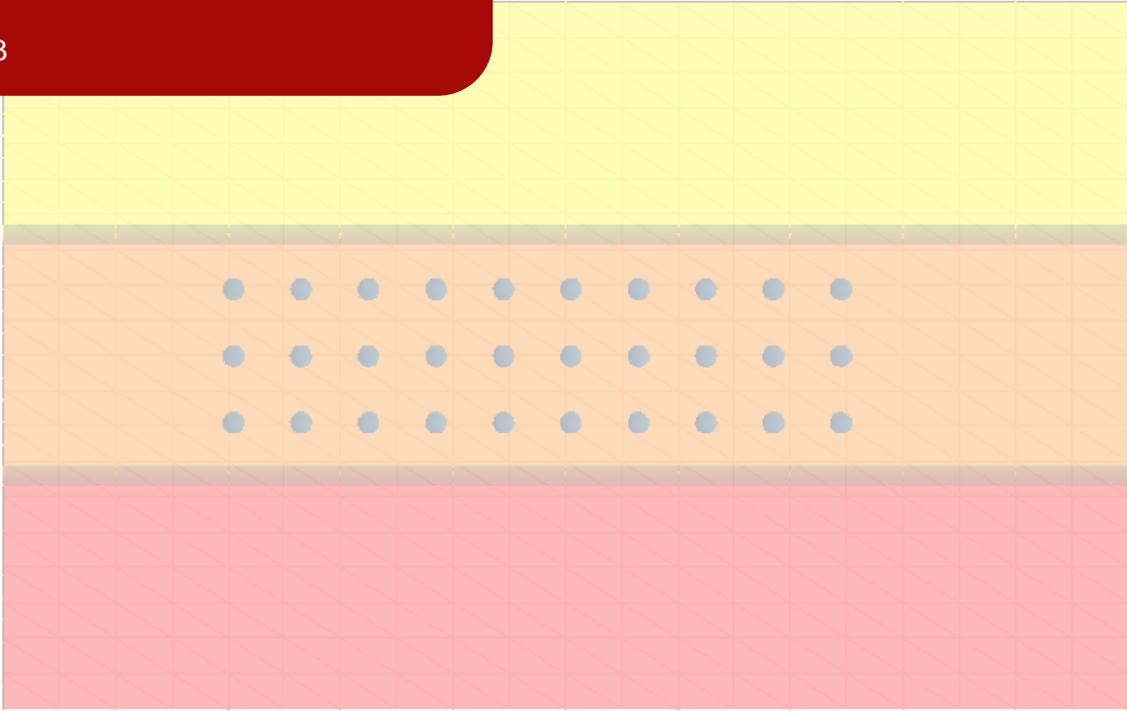

Apply the charge to All Holes, or a specific type.

Step 11 of 23

Timing: Non-Electronic

Select your surface and in-holes detonators.

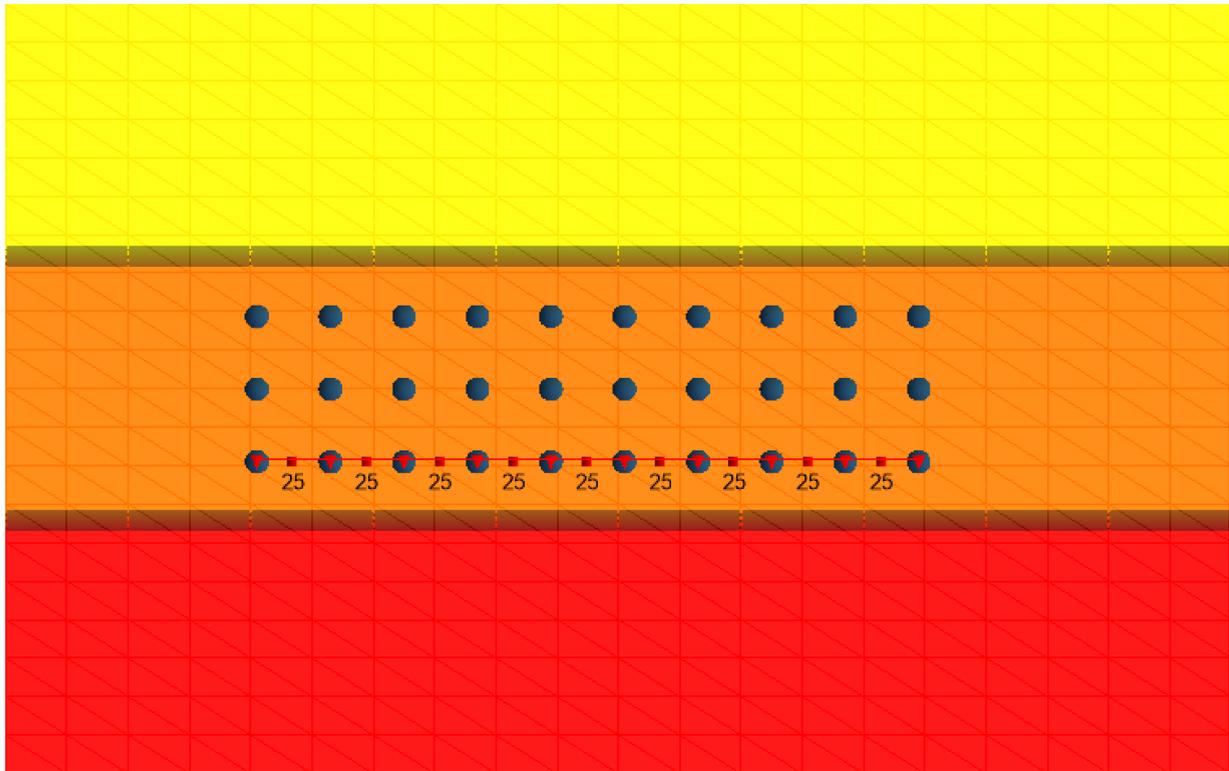

Step 12 of 23

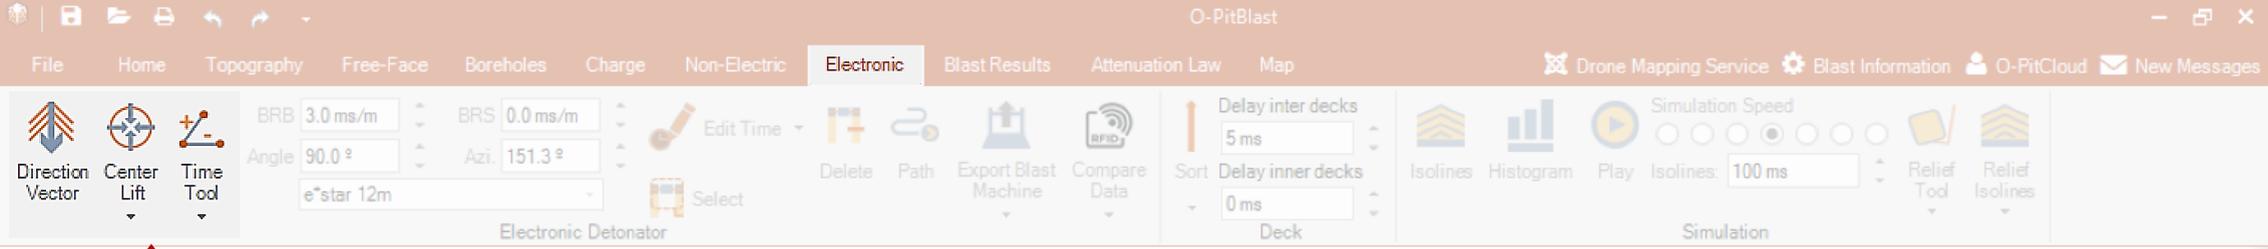

Timing: Non-Electronic

Select "Add Timing".
Drag the mouse between holes to connect.

Step 13 of 23

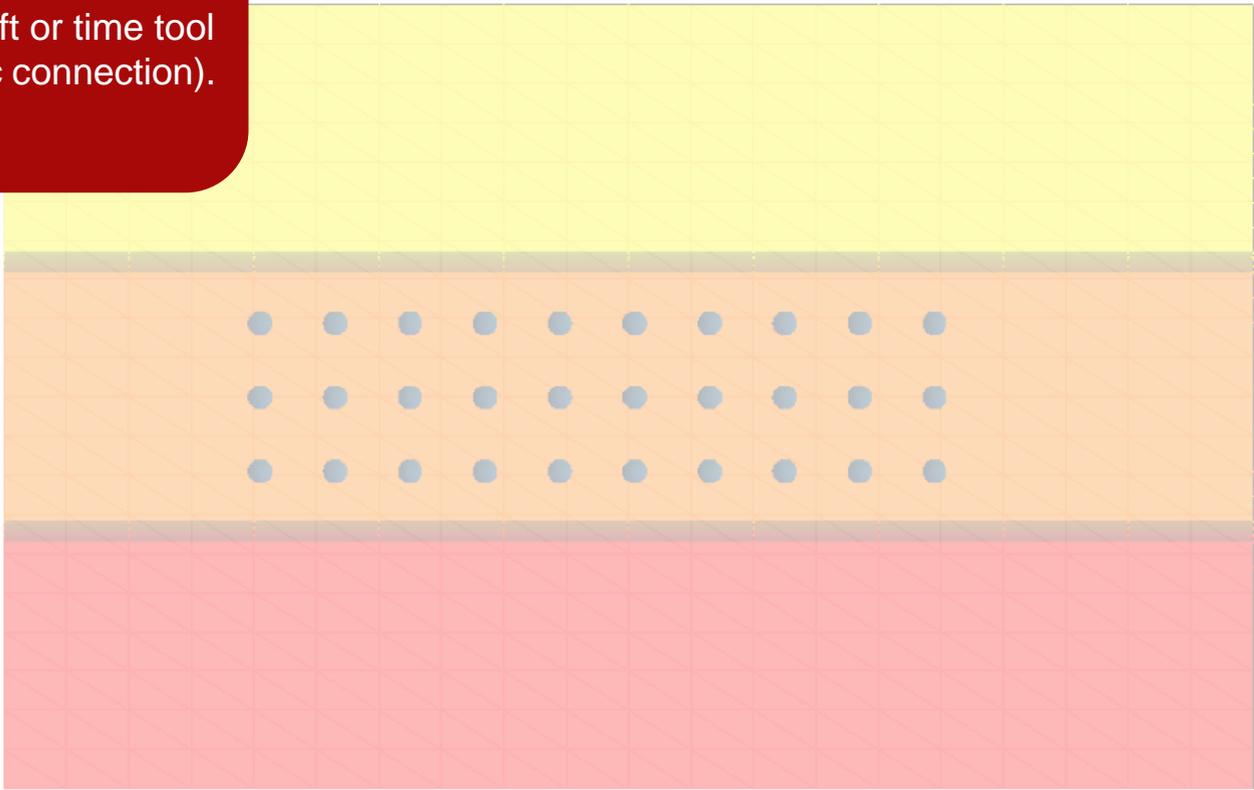

Timing: Electronic

Select your type of connection:
direction vector, center lift or time tool
(similar to non-electronic connection).

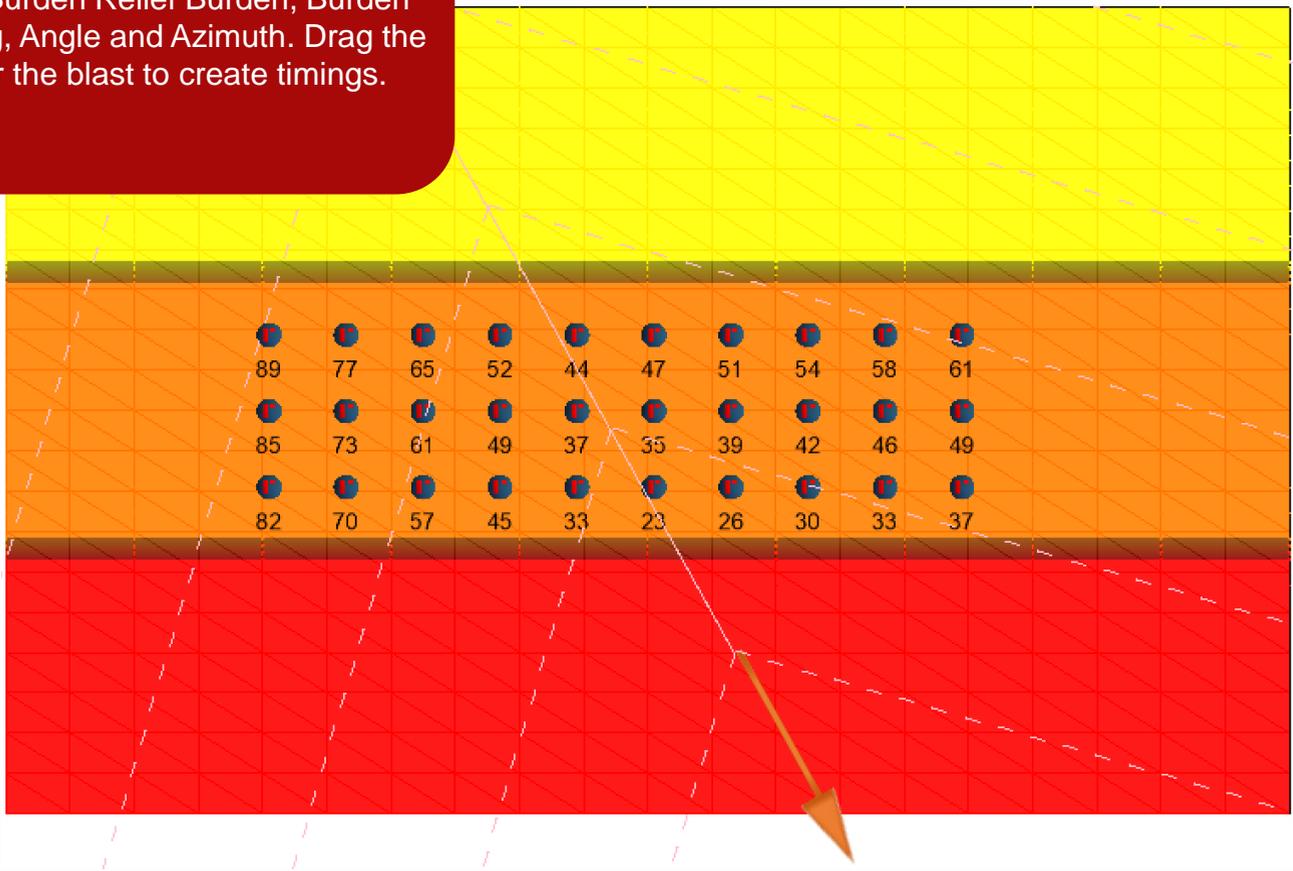

Step 14 of 23

Timing: Electronic

Select your Burden Relief Burden, Burden Relief Spacing, Angle and Azimuth. Drag the mouse over the blast to create timings.

Step 15 of 23

Import Data
Data

OFF

PPV (90%) = 1600 Q 0.800 D -1.600

PPV (50%) = 1600 Q 0.800 D -1.600
