

Timing

Plan your blast tie-up with the available tools for any kind of detonators.

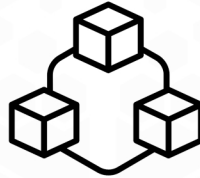

Charging

Create charge rules, plan decks and load automatically your blast.

Topography

Import terrain information, adjust bench bottom and generate contour lines.

Borehole

Create blast patterns, edit holes geometry and generate drilling plans.

Free Face

Import 3D Laser and borehole deviation information, identify critical burdens and borehole's profile.

Vibration

Import vibration historical data, create attenuation laws and predict vibration.
